SKILLS SUMMARY

Practical AI builder shipping working systems across computer vision, LLM pipelines, RAG, multi-agent systems, generative AI, and AI automation. Skilled in Python, PyTorch, OpenCV, Hugging Face, FAISS, vector databases, API integration, Docker, and Linux.

EDUCATION

National University of Computer and Emerging Sciences (FAST)
Bachelor of Artificial Intelligence | CGPA: 3.26/4.00

Islamabad, Pakistan
Aug. 2022 – Jun. 2026

WORK EXPERIENCE

AI Intern

Jul. 2026 – Present

AKSA-SDS | On-site

Pakistan

- Developing AI-powered solutions using Python, machine learning, and large language models for real-world business applications.
- Working with web scraping, data preprocessing, feature engineering, and model development pipelines.

Machine Learning Intern

Jun. 2026 – Present

FlyrankAI | Remote

- Developing machine learning solutions using Python for production-oriented applications.
- Implementing LLM-based workflows, API integrations, and evaluation pipelines for AI applications.

Lab Demonstrator (Teaching Assistant)

Aug. 2025 – May 2026

National University of Computer and Emerging Sciences (FAST)

Islamabad, Pakistan

- Conducted laboratory sessions for Programming Fundamentals (C++), Object-Oriented Programming, and Programming for AI (Python).
- Guided students in debugging, algorithm design, object-oriented programming, and Python programming concepts.
- Assisted faculty with lab assessments, assignments, and practical evaluations while mentoring students.

PROJECTS

SurveilX – AI-Powered Anomaly Detection (FYP) | CNN, CLIP, Uvicorn | GitHub

Sep 2025 – May 2026

- Developed surveillance system for detecting pre-violence cues and anomalies such as fighting, stealing, burglary, and shooting
- Implemented Visual Prompting for natural language-based scenario search
- Built real-time backend using Uvicorn and interactive dashboard using React

VeriVision Media Provenance App | Blockchain, FAISS, Perceptual Hashing | GitHub | Hugging Face

May 2026

- Built media provenance system using perceptual hashing and deep feature similarity
- Used ResNet50 embeddings with FAISS for image matching and tamper detection

ConstructGuard | CNN, Pytorch | GitHub | Hugging Face

Dec 2025

- Developed computer vision system for real-time safety compliance detection
- Trained CNN models to detect helmets and protective equipment on construction sites

Voyant | Agentic AI, CrewAI | GitHub

Nov 2025

- Designed an autonomous agent workflow to generate personalized travel itineraries
- Integrated real-time data retrieval and reasoning pipeline

Crisis Simulator (Multi-Agent Disaster Response) | ReAct, Reflexion, Python | GitHub

Sep 2025

- Built multi-agent system coordinating drones and emergency vehicles for earthquake response
- Implemented ReAct and Reflexion frameworks for intelligent planning and decision-making

TECHNICAL SKILLS

Languages: Python, C++, SQL, C#, MASM 8086

AI & ML: PyTorch, TensorFlow, Scikit-learn, YOLOv8, OpenCV, Computer Vision, NLP, Reinforcement Learning

LLM & Agentic Systems: LLM, RAG, LangChain, LangGraph, CrewAI, Multi-Agent Systems, Generative AI, Prompt Engineering

Vector Search & APIs: FAISS, Vector Database, Hugging Face, OpenAI API, API Integration, Gemini API

Automation & Tools: AI Automation, n8n, Zapier, Retell AI, Docker, Linux, Git, Uvicorn, VS Code, MySQL
